

A helping hand for literacy ◀

## Building a Foundation for Success

AutoSkill International Inc. is a recognized leader in providing software-based literacy intervention solutions that achieve proven results, and are tailored to the unique needs and challenges of students, teachers and school and district administrators. With years of experience in thousands of schools, AutoSkill is committed to helping educators provide students with the fundamental literacy skills they need to succeed.

### **Literacy intervention: A helping hand to students who need it the most**

Experienced educators know that literacy does not come easily to every student, regardless of the curriculum or teaching methods employed.

Despite the best efforts of teachers, research shows that some students still do not grasp key concepts. And while administrators are already doing an exceptional job of providing students with a strong curriculum, curricula and curriculum-based solutions simply do not solve all the problems faced by those students who are falling behind.

At AutoSkill, we understand. Our research-based software was designed to extend a helping hand to those students who need it the most. Through individualized education plans and constant motivation, the AutoSkill solution enables students to achieve real, permanent gains. More importantly, it allows them to build a strong foundation in all the basic skills they need to gain access to life's opportunities.

Of course, literacy is about much more than reading. Research suggests that more than half of students who are struggling in one of either reading or mathematics are also struggling in the other. That is why our literacy intervention solution is the only one to offer effective, proven assistance in building both fundamental reading and math skills.

AutoSkill gives you the helping hand you need, to help *all* your students succeed.

---

**AutoSkill offers effective and tailored assistance in both reading and mathematics, extending the helping hand educators need to reach every struggling student.**

**A cost-effective solution for administrators. An effective tool for teachers. Permanent gains for students.**

To realize permanent, measurable gains, students need individualized assistance in those areas they find most challenging. But the reality is, the vast majority of school and district administrators are simply unable to provide the individual instruction required to help meet the needs of every struggling student.

That is where AutoSkill comes in. Based on extensive research and created to meet the needs of students, teachers and administrators alike, our solutions extend the effectiveness of a reading or math specialist to every struggling student. What is more, our solutions are specifically built to be adaptable for use on a classroom, school and even district-wide basis.

Working together with you and your curriculum, the AutoSkill Academy of READING® and Academy of MATH® can help you implement and benefit from an individualized literacy intervention program for any number of students in record time.

Utilizing our patented approach, the AutoSkill solution combines a thorough assessment of each student's strengths and weaknesses with individual instructional plans and constant motivation. This allows every student to work independently on those areas where they need the most help, so they can begin to realize concrete gains almost immediately.

Students using the AutoSkill Academy of Reading program, for example, achieve an average of a full level of improvement after only 10 hours on the program. After 25 hours, students consistently achieve an average of 2.5 levels of improvement.

---

**AutoSkill helps students measurably improve their math and reading skills, make permanent gains - and build the foundation for a successful life.**

**AutoSkill International Inc. The helping hand you need. To help your students succeed.**

**AutoSkill International Inc. delivers highly effective and scalable literacy intervention solutions. Working in conjunction with school and district level educators, AutoSkill has helped millions of struggling students to not only raise their test scores, but, more importantly, to build the basic reading and mathematical literacy skills that form the foundation for successful lives.**
